

NIB MANUFACTURING

Manufacturing Solutions

NIB creates and sustains thousands of U.S.-based manufacturing jobs each year, producing a wide variety of finished products for government and commercial customers. NIB delivers *best value* solutions—affordable, high-quality products and services tailored to meet customer requirements.

NIB helps keep the nation's economic base strong by tapping into a capable yet largely undiscovered workforce of people who are blind. Our state-of-the-art, ISO-certified manufacturing facilities across the country form an integrated network of providers and suppliers, which shortens delivery times and reduces costs.

We are America's best-kept manufacturing secret.

Blindness is not a barrier to employment.

Despite continued gains in employment, people who are blind remain one of the nation's greatest untapped labor resources: Seven out of ten working-age Americans who are blind are not employed. Since 1938, NIB has focused on enhancing opportunities for economic and personal independence of people who are blind, primarily through creating, sustaining and improving employment. NIB and its network of associated nonprofit agencies are the nation's largest employer of people who are blind through the manufacture and provision of SKILCRAFT® and other products and services of the AbilityOne® Program.

Delivering Value

NIB provides end-to-end manufacturing solutions customized to fit customer needs. No job is too big or too small.
